TOSHIBA PRODUCT TRAINING PROGRAM

- Have you ever wondered how a motor works?
- How does a drive turn AC into pulse width modulation?
- What allows a drive to control motor speed?

Toshiba Training can help you with answers to these questions and more!

BENEFITS OF TRAINING

Toshiba International Corporation (TIC) offers a variety of training opportunities specific to Toshiba motors, adjustable speed drives (ASD), and power apparatus & components products (PAC) and related applications. Our training campus, which is located at our Houston, Texas manufacturing facility, includes several dedicated classrooms along with an ASD training lab to support hands-on training for low and medium voltage ASD products.

Students will develop confidence working with TIC products by acquiring product knowledge and related skills from experienced instructors. This practical knowledge will help students to maintain and operate equipment and to address problems to maximize equipment uptime and production.

DEVELOPING PRODUCT KNOWLEDGE AND INSIGHT

TIC instructors offer a wide range of courses designed to address the needs of both new and experienced personnel. These include classes addressing fundamentals of adjustable speed drives and motors, including electronic and electrical theory, as well as classes on commissioning and maintenance for adjustable speed drives and solid state starters. In-person training also combines classroom presentations, demonstrations and hands-on exercises to providing students with a collaborative learning environment.

TIC provides training opportunities in the following areas:

Products, Application and Field Service Training

- Motor and Drive Theory Analysis
- ASD, Motor, Motor Starter and PAC Product- and Application-Specific Courses
- HVAC Extended Warranty Certification
- Installation, Connections and Programming
- Commissioning and Maintenance
- Product Testing, Troubleshoot and Repair
- TIC Factory Training Certification

CUSTOMIZABLE TRAINING OPTIONS

In order to meet your specific needs, TIC offers the following types of training:

ONLINE

Need some product insight? Virtual webinars covering a wide range of topics for motors, ASDs and PAC can help with this. Be sure to check out what's on the monthly virtual class schedule at: www.toshiba.com/tic/tools-resources/training

IN-PERSON

Ready to take a deeper dive? Multi-day in-person classes at a TIC training facility that include presentations, demonstrations and hands-on learning are a great way to increase your knowledge base. Classes are available in Houston, Texas or Edmonton, Alberta, Canada. Choose from scheduled classes shown on the Field Service Training Calendar (www.toshiba.com/tic/tools-resources/training).

ONSITE

Logistically impossible to schedule large groups for in-person classes? TIC can assist with on-site training opportunities at your location. To request information about or to schedule on-site training, please contact us at TIC-Service@toshiba.com.
